

PRODUCT STANDARDS

STANDARD COMFORT

An architect gets on rare occasion a free hand because most of projects have their economic limits. But when you meet an investor who properly understands the quality of the site and the building can stand a high level, so you're in luck. Such an investor listens architect who tries to reconcile design and interiors designed to bring the level of the whole project.

Even if you have a relatively free hand in the selection of materials and without the proper space do nothing. Height ceilings, large glazed surfaces and vistas on the terrace without disturbing the railing creates the perfect foundation on which to build. Choice of standards has been optimized for a specific type of future users. These standards are aligned to form a unit and complement one another. Qualitatively, the material can not be the only reminder always were selected products from the European Union's well-known brand manufacturers, but it can be a difference of opinion on the design.

In your apartment you live yours. You have your life experience, prefer a certain lifestyle, you have some favorite fashion, architecture, art – all this affects you, creating requirements for subsequent furnishings. It is therefore normal that the original proposal can only be some fundamental idea on which we build further, to create an interior in which you feel good – and this is the aim of your new home.

Ing. arch. Mojmír Ranný

BATHROOMS AND TOILETS – VARIANT CASABLANCA

Comfort as standard bathrooms were selected, three types of materials with vastly different design.

Casablanca variant uses the basic contrast of pure white with dark tile floor. High gloss coating is considered rectified and therefore a minimum gap. On the floor, it is possible to select the material “in hot / cold shade.” Bathrooms at first glance looks very minimalist, but can simply more cozy towels, decorations and other accessories. The white color does not limit you. Practically you can style your bathroom identify yourself and change it if necessary every year...

BATHROOMS AND WC – MIXERS

Mixers in your bathroom is not just a design element, but it is primarily a functional product with many components, which are exposed to external influences. Nevertheless, the water should be clean and the correct hardness is not always the case. Assuming you want to tap the mixer lasted as long as the other materials used, must choose a quality product from a brand. German manufacturer Hansgrohe with a tradition of 115 years is the best guarantee.

Logis series was launched in 2015 and, moreover, that meets all the required technical parameters, as well as its design fits into the concept of the project.

BATHROOM – SHOWER

Shower is another highly-loaded element in the bathroom. The basic quality parameters are: glass and treatment against limescale, quality profiles and their scratch resistance and processing travels, on which depends the life of the stall.

All these reasons led us to choose a branded manufacturer HÜPPE that meets the stringent requirements of the market.

Design and size of the stall is dependent on the available sizes and en suite facilities.

BATHROOM – BATH

Dutch manufacturer Riho for several years establishing itself on the Czech market. Moravia built a modern production plant that a large part of its production is exported to Western Europe.

Riho Bathtubs are made of cast acrylic, which is a high quality non-porous plastic which is colored throughout the thickness. Special surface is safe against slipping, but also has the highest parameter for easy maintenance. Acrylate has a sound damping effect, as the movement in the bath and in the filling. Disturb neither you nor neighbors. Thanks to its non-porous surface prevents the formation of bacteria and sediment.

Prestigious Marina Island project was selected the highest number of van – a series of Lusso. Modern clean design is fully compatible with other selected products. Size tubs available depends on the size and en suite facilities.

The illustration photo shows a bathtub Lusso (170×75 cm waste on middle), which is one of the standard version.

Bath Lusso
170×75 cm (waste to middle)
180×80 cm (waste to middle)
Bath Lusso plus
170×80 cm (waste to the region)

Three-layer wooden flooring MAGNUM

Three-layer wooden flooring is usually installed by floating on the top of the sound insulation undelayment and vapour-tight foil.

Layer consists of about 3 mm solid oak with UV hardened varnish finish. The usual way of installation is on the free bond as well as on illustrative picture.

Technical parameters:

- size of planks 190×2200 mm,
- thickness 13 mm + 2 mm sound insulation,
- a parquet pattern (3-strip),
- wooden veneer skirting 16×40mm,
- threshold strip 32×5 AL Elox - silver, champagne, bronze
